Re: Olin Water Services, Kansas City
EPA I.D. No. KSD000203638

Dear Mr. Harrington:

We have reviewed the Part A and Part B applications submitted by the facility for completeness and have the following comments to offer:

1. Part A application

- (a) Capacity of drum storage area (S01) is reported as 9000 gallons (about 164 drums of 55 gallons each). However, on Page 36 of 122.25 (b)(1) in the Part B application, Olin is proposing to store 80 drums. The facility must be asked to clarify this inconsistency and amend their Part A, if necessary.
- (b) Wastes reported on their Part A application and Form 8700-12 are not consistent with those reported on their Part B. P090, U031, U070 and U114 are not addressed in 122.25(a)(2) of their Part B. Olin must be asked to either amend their Part A and 8700-12 or address these wastes in the Waste Analysis Plan of their Part B.

2. Topographic Map

- (a) From the copy of the map submitted with their Part B, it cannot be determined if the facility meets all these requirements. We understand that Olin submitted the originals with their Part A application. You might want to review this and address the requirements in your letter.
- (b) The date and scale on the sewer line map are not shown.
